2010  
2011

More dates for 2011 to be confirmed!

## PENNYBRIDGE PIONEERS TEN YEAR ANNIVERSARY TOUR!

Millencolin released their big breakthrough album Pennybridge Pioneers ten years ago. The album was recorded in Hollywood and produced by Brett Gurewitz, Epitaph Records owner and guitar player of Bad Religion. The title Pennybridge is referring to the bands hometown Örebro, Sweden. Pennybridge is a direct translation of the towns name into English.

Pennybridge Pioneers is Millencolin's fourth album. It quickly sold gold record status in Australia and is until this day, the bands best selling album world wide.

The idea for the 10 year anniversary tour came up after Millencolin played a special show at the closing night of a local venue in 2009. It was a packed sold out show with fans traveling from as far as Brazil to Sweden just for that show. The band later got feedback from fans all around the world requesting that show to be taken on tour. Since it's now ten years since the release and the band is in between records, they thought this would be a good time to make this happen. The album will be played from first to last song and after that a bunch of classic songs from the three first albums will be performed.

The tour started september 9 in Quebec City 2010, Canada and have carried on through South America, Central America, the Soundwave Festival tour in Australia together with bands like Iron Maiden, Slayer and many more. The band just finished a North European lag in april. Now it's time for summer festivals including main stage performances at Rock Am Ring and Rock Im Park. South European club shows was just confirmed for september. More shows will be announced soon.

- "This tour is so much fun! It's awesome to see the crowds response to the old songs of that album! We got so much positive response from that local show we did back in Sweden, that it felt like we owed it to our fans to take this album on tour again.", says guitar player Erik Ohlsson.

Brand new songs will be recorded during fall for an early 2012 release.
